**SOLID
CONSTRUCTION**

Advantages:

- predominantly for new constructions
- stable value

HIGH QUALITY MATERIALS.

The feeling of space is significantly influenced by the materials used. High-quality surfaces create an atmosphere that subtly creates a climate of well-being. For vaulted buildings are refined wood floors suitable, which visually and haptically underline the special experience.

WINES THERE ARE MANY.

Whether new construction of a barrel cellar, or conversion and gutting of an old, cramped building structure - the vault structure creates in each case an inner width and elegance for an inviting storage and sales space.

INTERNATIONAL.

Space quality as an international standard in gastronomy: whether with classic - Tuscan columns or masonry brick pillars - the combination of forms and materials is possible for all conceivable space situations and design wishes.

SIGNS OF LIFE.

A light-flooded vaulted structure forms an inviting framework for an individual arrangement of kitchen, dining and living area in flowing room zones - a beautiful and spacious room for you and your guests. An example of modern, timeless room culture.

EVERYTHING IS POSSIBLE.

- SPECIAL SHAPES
- INDIVIDUAL ROOM DESIGNS
- LOGGIA FREE SEAT
- WELLNESS
- DOMES
- LIGHT FLOOR SPACE = COMPLETE SOLUTION

LIGHT ARCHITECTURE.

“When light hits surfaces, it creates space, plasticity, creates contours and shadows. If you filter or dim light, or let it reflect through other materials, then light creates spaces and atmosphere. This special ambience and sensation is very important to us.

diArco works with a renowned light planning office, which supports in the field of light planning and / consulting from the idea to the holistic implementation.”
